## Advance SIM CARD Setup Command (For professional user only)

If your SIM Card is not working well with the device. You can try to fix it by below commands.

### Setup the APN

SMS Format: apn,[apn name],[user],[password],[port],[proxy]#

Start with "apn,", end with "#" Separate by ","

If the value is empty. Then add a ","

For example name:

```
<apn type="default,supl"; apn name="airtelnet.es";
```

```
password="vodafone" ;user="vodafone"/>mnc="06" ;mcc="214";carrier="INTERNET GPRS";
```

SMS Command like below:

```
apn,airtelnet.es,vodafone,vodafone,,#
```

### Test the connection

Basic command:

test# (get basic apn information)

ping# (check if the data connection is working or not)
